

Covanta Lake

2019 Facility Performance

Landfill Diversion

18,755 garbage trucks diverted from landfill

= 71 miles of garbage trucks bumper to bumper

Electric Generation

The electricity produced at the plant can:

Provide electricity for 7 **thousand** homes for **1 Year**

Fully charge a Tesla Model S vehicle **800 thousand** times

Metal Recovery

Ferrous

4,000 tons

Non-Ferrous

180 tons

The metal recovered is equivalent to:

3 thousand cars from recovered steel

Energy savings equivalent to **800 thousand** gallons of gasoline

13 million aluminum cans

A paper clip chain that wraps around the Earth **6** times

Net GHG Reduction

Compared to Landfilling, **1 Ton** of MSW processed reduces lifecycle emissions* by **0.9 tons** of net CO₂e

In 2019, the plant **avoided emissions** equivalent to:

26 thousand passenger vehicles driven for **1 Year**

Burning **134 million** pounds of coal

* Life Cycle calculations are based on specific facility operating data, local electrical grid, and U.S. national average landfill practices

Average Annual Facility Emissions

2017-2019 WTE Emissions Compared to Federal Standards

The facility operates up to **99% below** federal emissions standards

Emissions compared to federal guidelines for existing facilities (40 CFR 60 Subpart Cb). Facility may be subject to more stringent requirements by permit or in accordance with other federal guidelines.

How Do Our Emissions Compare to Other Sources in the County?

Local air emissions* in Lake County, FL

Excluding Dust Sources, which make up 62% of the total inventory.

Continuous Emission Monitoring Compliance

✓ In 2019, the facility was **100.00%** compliant with CEMS emissions standards

* Based on the 2017 US EPA National Emissions Inventory; the most recently released complete inventory. Where available, the facility's 2017 emissions were replaced with the reported 2019 emissions.

** Total PM₁₀ based on measured filterable PM and NEI emission factors.
