

# Covanta Bristol

## 2020 Facility Performance

### Landfill Diversion

27,310 garbage trucks diverted from landfill

103 miles bumper to bumper

Covanta Bristol

Rockefeller Center, NYC

### Electric Generation

The electricity produced at the plant can:

Power **10 thousand** homes for **1 Year**

Charge **24 thousand** electric vehicles for **1 Year**

### Metal Recovery

**Ferrous**

**6,600 tons**

**Non-Ferrous**

**500 tons**

The metal recovered is equivalent to:

**6 thousand** cars from recovered steel

Energy savings equivalent to **1.6 million** gallons of gasoline

**33 million** aluminum cans

A paper clip chain that wraps around the Earth **10 times**

### Net GHG Reduction

**1 Ton of waste** processed by Waste-to-Energy reduces lifecycle emissions\* by **0.9 tons of net CO2e** compared to landfilling

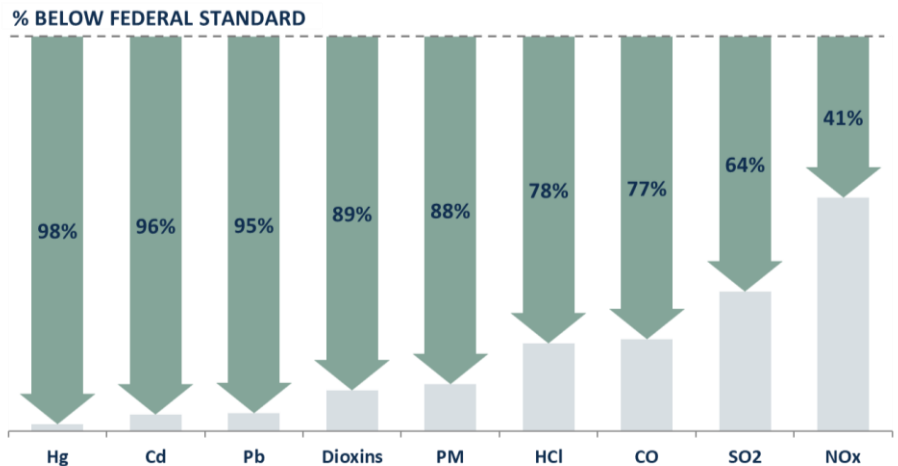

In 2020, the facility avoided emissions equivalent to **40 thousand** passenger vehicles driven for **1 Year**, or burning **203 million** pounds of coal

\* Life Cycle calculations are based on specific facility operating data, local electrical grid, and U.S. national average landfill practices

### Average Annual Facility Emissions

#### 2018-2020 WTE Emissions Compared to Federal Standards

The facility operates up to **98% below** federal emissions standards

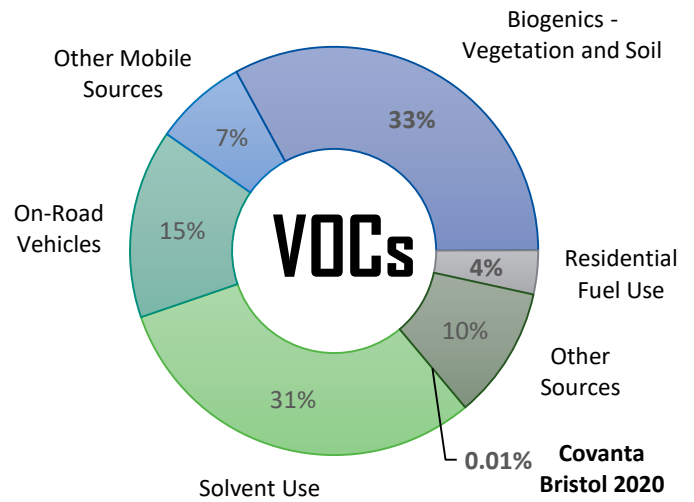

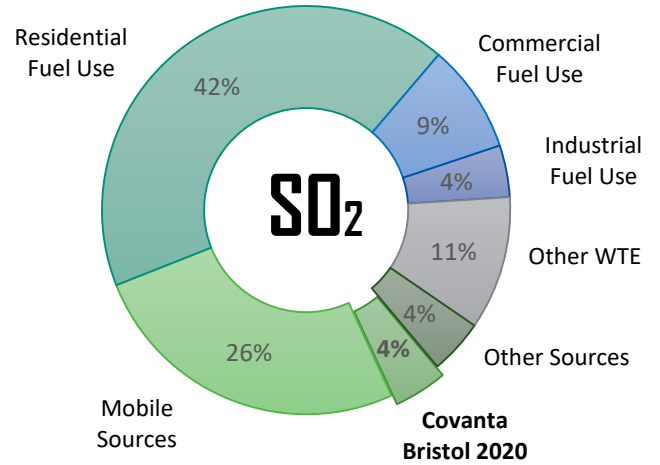

Emissions compared to federal guidelines for existing facilities (40 CFR 60 Subpart Cb).

Facility may be subject to more stringent requirements by permit or in accordance with other federal guidelines.

# How Do Our Emissions Compare to Other Sources in the County?

Local air emissions\* in Hartford County, CT

Excluding Dust Sources, which make up 49% of the total inventory.

## Continuous Emission Monitoring Compliance

✓ In 2020, the facility was **99.98%** compliant with CEMS emissions standards

\* Based on the 2017 US EPA National Emissions Inventory; the most recently released complete inventory. Where available, the facility's 2017 emissions were replaced with the reported 2020 emissions.
